

Original Code from Processing.org
(<https://processing.org/examples/follow1.html>)

```
float x = 100;
float y = 100;
float angle1 = 0.0;
float segLength = 50;

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
}

void draw() {
  background(0);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);

  segment(x, y, angle1);
  ellipse(x, y, 20, 20);
}

void segment(float x, float y, float a)
{
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}
```

Plagiarism Example 1: Simply rename variables or symbols

```
float ax = 100;
float ay = 100;
float angle = 0.0;
float len = 50;

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
}

void draw() {
  background(0);

  float dx = mouseX - ax;
  float dy = mouseY - ay;
  angle = atan2(dy, dx);
  ax = mouseX - (cos(angle) * len);
  ay = mouseY - (sin(angle) * len);

  drawSegment(ax, ay, angle);
  ellipse(ax, ay, 20, 20);
}

void drawSegment(float x, float y, float a)
{
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, len, 0);
  popMatrix();
}
```

Original Code from Processing.org
(<https://processing.org/examples/follow1.html>)

```
float x = 100;
float y = 100;
float angle1 = 0.0;
float segLength = 50;

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
}

void draw() {
  background(0);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);

  segment(x, y, angle1);
  ellipse(x, y, 20, 20);
}

void segment(float x, float y, float a)
{
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}
```

Plagiarism Example 2: Simply replace numerical values

```
float x = 200;
float y = 200;
float angle1 = 1.0;
float segLength = 100;

void setup() {
  size(600, 480);
  strokeWeight(25.0);
  stroke(200, 200);
}

void draw() {
  background(50);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);

  segment(x, y, angle1);
  ellipse(x, y, 30, 30);
}

void segment(float x, float y, float a)
{
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}
```

Original Code from Processing.org
(<https://processing.org/examples/follow1.html>)

```
float x = 100;
float y = 100;
float angle1 = 0.0;
float segLength = 50;

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
}

void draw() {
  background(0);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);

  segment(x, y, angle1);
  ellipse(x, y, 20, 20);
}

void segment(float x, float y, float a)
{
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}
```

Plagiarism Example 3: Simply rearrange code segments

```
float x = 100;
float y = 100;
float angle1 = 0.0;
float segLength = 50;

void segment(float x, float y, float a) {
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
}

void draw() {
  background(0);
  segment(x, y, angle1);
  ellipse(x, y, 20, 20);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);
}
```

Original Code from Processing.org
(<https://processing.org/examples/follow1.html>)

```
float x = 100;
float y = 100;
float angle1 = 0.0;
float segLength = 50;

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
}

void draw() {
  background(0);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);

  segment(x, y, angle1);
  ellipse(x, y, 20, 20);
}

void segment(float x, float y, float a)
{
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}
```

Plagiarism Example 4: Copy too much from sources, shows too little of your own thought

```
float x = 100;
float y = 100;
float angle1 = 0.0;
float segLength = 50;

void setup() {
  size(640, 360);
  strokeWeight(20.0);
  stroke(255, 100);
  textSize(20);
}

void draw() {
  background(0);

  float dx = mouseX - x;
  float dy = mouseY - y;
  angle1 = atan2(dy, dx);
  x = mouseX - (cos(angle1) * segLength);
  y = mouseY - (sin(angle1) * segLength);

  strokeWeight(20.0);
  segment(x, y, angle1);
  ellipse(x, y, 20, 20);

  strokeWeight(1);
  line(0, y, width, y);
  line(x, 0, x, height);
  String s = mouseX + " " + mouseY + " " +
angle1;
  text(s, 10, 20);
}

void segment(float x, float y, float a) {
  pushMatrix();
  translate(x, y);
  rotate(a);
  line(0, 0, segLength, 0);
  popMatrix();
}
```
